DiGi Electronics Part Number	PA0515.321NLT-DG
Manufacturer	Pulse Electronics
Manufacturer Product Number	PA0515.321NLT
Description	FIXED IND 325NH 35A 0.63MOHM SMD
Detailed Description	325 nH Shielded Inductor 35 A 0.63mOhm Nonstandard

Purchase and inquiry

Manufacturer Product Number:	Manufacturer:
PA0515.321NLT	Pulse Electronics
Series:	Product Status:
PA0515NL	Active
Type:	Material - Core:
-	-
Inductance:	Tolerance:
325 nH	±20%
Current Rating (Amps):	Current - Saturation (Isat):
35 A	43A
Shielding:	DC Resistance (DCR):
Shielded	0.63mOhm
Q @ Freq:	Frequency - Self Resonant:
-	-
Ratings:	Operating Temperature:
-	-40°C ~ 130°C
Features:	Mounting Type:
-	Surface Mount
Package / Case:	Supplier Device Package:
Nonstandard	-
Size / Dimension:	Height - Seated (Max):
0.440" L x 0.440" W (11.18mm x 11.18mm)	0.354" (9.00mm)

Environmental & Export classification

RoHS Status:	Moisture Sensitivity Level (MSL):
ROHS3 Compliant	1 (Unlimited)
REACH Status:	ECCN:
REACH Unaffected	EAR99
HTSUS:	
8504.50.4000

Notes:

1. The rated current as listed is either the saturation current or the heating current depending on which value is lower.
2. The nominal DCR tolerance is by design. The nominal DCR is measured from point ⓐ to point ⓑ, as shown below on the mechanical drawing.
3. The saturation current is the typical current which causes the inductance to drop by 20% at the stated ambient temperatures (25°C and 100°C). This current is determined by placing the component in the specified ambient environment and applying a short duration pulse current (to eliminate self-heating effects) to the component.
4. The heating current is the DC current which causes the part temperature to increase by approximately 40°C. This current is determined by soldering the component on a typical application PCB, and then applying the current to the device for 30 minutes without any forced air cooling.
5. In high volt*time applications, additional heating in the component can occur due to core losses in the inductor which may necessitate derating the current in order to limit the temperature rise of the component. To determine the approximate total losses (or temperature rise) for a given application, the coreloss and temperature rise curves can be used.
6. Pulse complies to industry standard tape and reel specification EIA481.
7. The temperature of the component (ambient plus temperature rise) must be within the stated operating temperature range.
8. For part marking only the PA0513 series has the name 'Pulse' marked on the part. Due to component size, the remaining series' of parts are marked only with the Pulse PN, Date Code and Country of Origin.
