PA4343.222NLT Datasheet

DiGi Electronics Part Number	PA4343.222NLT-DG
Manufacturer	Pulse Electronics
Manufacturer Product Number	PA4343.222NLT
Description	FIXED IND 2.2UH 22A 4.2 MOHM SMD
Detailed Description	2.2 µH Shielded Molded Inductor 22 A 4.2mOhm Max Nonstandard

Purchase and inquiry

Manufacturer Product Number:	Manufacturer:
PA4343.222NLT	Pulse Electronics
Series:	Product Status:
PA4343.XXXNLT	Active
Type:	Material - Core:
Molded	-
Inductance:	Tolerance:
2.2 µH	±20%
Current Rating (Amps):	Current - Saturation (Isat):
22 A	37A
Shielding:	DC Resistance (DCR):
Shielded	4.2mOhm Max
Q @ Freq:	Frequency - Self Resonant:
-	-
Ratings:	Operating Temperature:
AEC-Q200	-40°C ~ 125°C
Inductance Frequency - Test:	Features:
100 kHz	-
Mounting Type:	Package / Case:
Surface Mount	Nonstandard
Supplier Device Package:	Size / Dimension:
-	0.551" L x 0.504" W (14.00mm x 12.80mm)
Height - Seated (Max):	
0.256" (6.50mm)	

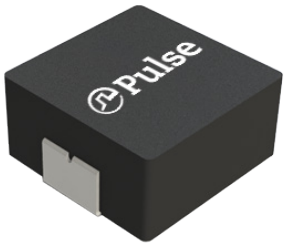
Environmental & Export classification

RoHS Status:	Moisture Sensitivity Level (MSL):
ROHS3 Compliant	1 (Unlimited)
REACH Status:	ECCN:
REACH Unaffected	EAR99
HTSUS:	
8504.50.4000	

SMT Power Inductor

High Current Molded Power Inductor - PA4343.XXXNLT & PM4343.XXXNLT Series

Pulse a YAGEO company



- ***Height:*** *6.5mm Max*
- ***Footprint:*** *14.0mm x 12.8mm Max*
- ***Current Rating:*** *up to 55.0A*
- ***Inductance Range:*** *0.15uH to 47.0uH*
- *Shielded construction and compact design*
- *High current, low DCR, and high efficiency*
- *Minimized acoustic noise and minimized leakage flux*
- *200Vdc Isolation between terminal and core*

Electrical Specifications @ 25°C - Operating Temperature -55°C to +125°C

Notes:

1. Actual temperature of the component during system operation (ambient plus temperature rise) must be within the standard operating range.
2. The saturation current is the current at which the initial inductance drops approximately 30% at the stated ambient temperature. This current is determined by placing the compnent in the specified ambient environment and applying a short duration pulse current (to eliminate self-heating effect) to the component.
3. The rated current is the DC current required to raise the component temperature by approximately 40°C. Take note that the components' performanc varies depending on the system condition. It is suggested that the component be tested at the system level, to verify the temperature rise of the component during system operation.
4. The part temperature (ambient+temp rise) should not exceed 125°C under worst case operating conditions. Circuit design, PCB trace size and thickness, airflow and other cooling provisions all affect the part temperature. Part temperature should be verified in the end application.
5. Please note that the inductance tolerance of all parts are +/-20% except those indicated with a * which are +/-30%.
6. Parts shown in bold are standard catalog parts and are available through sample stock and distribution. Parts in lighter font are available but are not necessarily held in sample stock or distribution and lead times may be longer. Please contact Pulse for availablity.
7. The PM part numbers have full automotive IATF16949 certification. The PM part number dimensions are 100% tested in production but do not necessarily meet a product capability index (Cpk)> 1.33 and therefore may not strictly conform to PPAP.
8. Special Characteristics ▽

Mechanical

PA4343/PM4343
