2.5 V 1:5 Dual Differential LVDS Compatible Clock Driver

MC100EP210S

Description

The MC100EP210S is a low skew 1-to-5 dual differential driver, designed with LVDS clock distribution in mind. The LVDS or LVPECL input signals are differential and the signal is fanned out to five identical differential LVDS outputs.

The EP210S specifically guarantees low output-to-output skew. Optimal design, layout, and processing minimize skew within a device and from device to device.

Two internal 50 Ω resistors are provided across the inputs. For LVDS inputs, VTA and VTB pins should be unconnected. For LVPECL inputs, VTA and VTB pins should be connected to the V_{TT} (V_{CC} – 2.0 V) supply.

Designers can take advantage of the EP210S performance to distribute low skew LVDS clocks across the backplane or the board.

Features

- 20 ps Typical Output-to-Output Skew
- 85 ps Typical Device-to-Device Skew
- 550 ps Typical Propagation Delay
- The 100 Series Contains Temperature Compensation
- Maximum Frequency > 1 GHz Typical
- Operating Range: $V_{CC} = 2.375 \text{ V}$ to 2.625 V with $V_{EE} = 0 \text{ V}$
- Internal 50 Ω Input Termination Resistors
- LVDS Input/Output Compatible
- These are Pb-Free Devices

EP for QFN-32, only	The Exposed Pad (EP) on the QFN-32 package bottom is thermally connected to the die for improved heat transfer out of package. The exposed pad must be attached to a heat-sinking conduit. The pad is electrically connected to VEE.

^{*}Under open or floating conditions with input pins converging to a common termination bias voltage the device is susceptible to auto oscillation.

- 5. Measured with 400 mV source, 50% duty cycle clock source. All loading with 100 Ω across differential outputs.
- 6. Skew is measured between outputs under identical transitions of similar paths through a device.
- 7. Device-to-Device skew for identical transitions at identical V_{CC} levels.
- 8. Duty cycle skew guaranteed only for differential operation measured from the cross point of the input to the cross point of the output.
