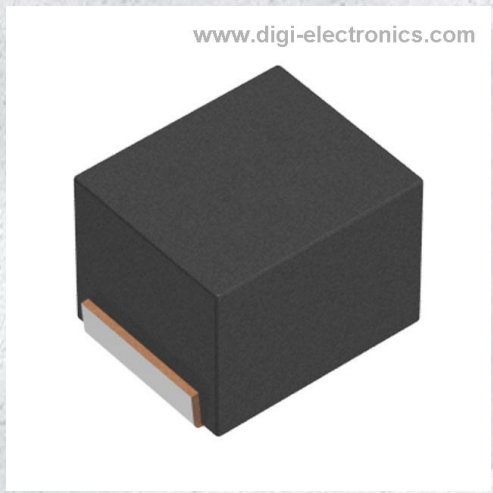
NLCV32T-R22M-EFRD Datasheet



https://www.DiGi-Electronics.com

DiGi Electronics Part Number	NLCV32T-R22M-EFRD-DG
Manufacturer	TDK Corporation
Manufacturer Product Number	NLCV32T-R22M-EFRD
Description	FIXED IND 220NH 2.4A 32.4MOHM SM
Detailed Description	220 nH Unshielded Drum Core, Wirewound Inductor 2.4 A 32.4mOhm Max 1210 (3225 Metric)

Tel: +00 852-30501935

RFQ Email: Info@DiGi-Electronics.com

Purchase and inquiry

Manufacturer Product Number:	Manufacturer:
NLCV32T-R22M-EFRD	TDK Corporation
Series:	Product Status:
NLCV-EFD	Active
Type:	Material - Core:
Drum Core, Wirewound	Ferrite
Inductance:	Tolerance:
220 nH	±20%
Current Rating (Amps):	Current - Saturation (Isat):
2.4 A	-
Shielding:	DC Resistance (DCR):
Unshielded	32.4mOhm Max
Q @ Freq:	Frequency - Self Resonant:
10 @ 25.2MHz	400MHz
Ratings:	Operating Temperature:
AEC-Q200	-40°C ~ 125°C
Inductance Frequency - Test:	Mounting Type:
25.2 MHz	Surface Mount
Package / Case:	Supplier Device Package:
1210 (3225 Metric)	1210 (3225 Metric)
Size / Dimension:	Height - Seated (Max):
0.126" L x 0.098" W (3.20mm x 2.50mm)	0.094" (2.40mm)

Environmental & Export classification

RoHS Status:	Moisture Sensitivity Level (MSL):
ROHS3 Compliant	1 (Unlimited)
REACH Status:	ECCN:
REACH Unaffected	EAR99
HTSUS:	
8504.50.8000	

INDUCTORS

TDK

Inductors for decoupling circuits
Wound ferrite
NLCV-EFRD series (for automotive)

RoHS | REACH SVHC-Free | Halogen Free | Lead Free

AEC-Q200

NLCV32-EFRD type

Product Portal | Search | Simulation Model | Selection Guide | Tech Library | Tech Note

FEATURES

- Resin mold type wound inductor for decoupling circuits.
- Operating temperature range: –40 to +125°C (including self-temperature rise)
- Compliant with AEC-Q200

APPLICATION

- Vehicle accessories (car navigation systems, car audio, ETC, other)
- Application guides: Car Infotainment

PART NUMBER CONSTRUCTION

NLCV	32	T	-	R10	M	-	EFRD
Series name	L×W×H dimensions 3.2×2.5×2.2 mm	Packaging style		Inductance (µH)	Inductance tolerance		Internal code

CHARACTERISTICS SPECIFICATION TABLE

L (µH)	Tolerance	Q ref.	L, Q measuring frequency (MHz)	DC resistance (Ω)±20%	Rated current (mA)max.	Part No.

PACKAGE QUANTITY

Package quantity	2000 pcs/reel

TEMPERATURE RANGE, INDIVIDUAL WEIGHT

Operating temperature range*	Storage temperature range**	Individual weight
–40 to +125 °C	–40 to +125 °C	50 mg

* Operating temperature range includes self-temperature rise.
** The storage temperature range is for after the assembly.

REMINDERS FOR USING THESE PRODUCTS

Before using these products, be sure to request the delivery specifications.

SAFETY REMINDERS

Please pay sufficient attention to the warnings for safe designing when using this products.

⚠ REMINDERS

- The storage period is less than 6 months. Be sure to follow the storage conditions (temperature: 5 to 40°C, humidity: 10 to 75% RH or less).
  If the storage period elapses, the soldering of the terminal electrodes may deteriorate.
- Do not use or store in locations where there are conditions such as gas corrosion (salt, acid, alkali, etc.).
- Before soldering, be sure to preheat components.
  The preheating temperature should be set so that the temperature difference between the solder temperature and chip temperature does not exceed 150°C.
- Soldering corrections after mounting should be within the range of the conditions determined in the specifications.
  If overheated, a short circuit, performance deterioration, or lifespan shortening may occur.
- When embedding a printed circuit board where a chip is mounted to a set, be sure that residual stress is not given to the chip due to the overall distortion of the printed circuit board and partial distortion such as at screw tightening portions.
- Self heating (temperature increase) occurs when the power is turned ON, so the tolerance should be sufficient for the set thermal design.
- Carefully lay out the coil for the circuit board design of the non-magnetic shield type.
  A malfunction may occur due to magnetic interference.
- Use a wrist band to discharge static electricity in your body through the grounding wire.
- Do not expose the products to magnets or magnetic fields.
- Do not use for a purpose outside of the contents regulated in the delivery specifications.
- The products listed on this catalog are intended for use in general electronic equipment (AV equipment, telecommunications equipment, home appliances, amusement equipment, computer equipment, personal equipment, office equipment, measurement equipment, industrial robots) under a normal operation and use condition.
  The products are not designed or warranted to meet the requirements of the applications listed below, whose performance and/or quality require a more stringent level of safety or reliability, or whose failure, malfunction or trouble could cause serious damage to society, person or property.
  If you intend to use the products in the applications listed below or if you have special requirements exceeding the range or conditions set forth in the each catalog, please contact us.

(1) Aerospace/aviation equipment
(2) Transportation equipment (electric trains, ships, etc.)
(3) Medical equipment
(4) Power-generation control equipment
(5) Atomic energy-related equipment
(6) Seabed equipment
(7) Transportation control equipment
(8) Public information-processing equipment
(9) Military equipment
(10) Electric heating apparatus, burning equipment
(11) Disaster prevention/crime prevention equipment
(12) Safety equipment
(13) Other applications that are not considered general-purpose applications

When designing your equipment even for general-purpose applications, you are kindly requested to take into consideration securing protection circuit/device or providing backup circuits in your equipment.

OUR CERTIFICATE

DiGi provide top-quality products and perfect service for customer worldwide through standardization, technological innovation and continuous improvement. DiGi through third-party certification, we striciy control the quality of products and services. Welcome your RFQ to Email: Info@DiGi-Electronics.com

Tel: +00 852-30501935
