<https://www.DiGi-Electronics.com>

DiGi Electronics Part Number	NLV25T-560J-PF-DG
Manufacturer	TDK Corporation
Manufacturer Product Number	NLV25T-560J-PF
Description	FIXED IND 56UH 75MA 12.1 OHM SMD
Detailed Description	56 μ H Unshielded Drum Core, Wirewound Inductor 75 mA 12.1Ohm Max 1008 (2520 Metric)

Tel: +00 852-30501935

RFQ Email: Info@DiGi-Electronics.com

DiGi is a global authorized distributor of electronic components.

Purchase and inquiry

Manufacturer Product Number:

NLV25T-560J-PF

Series:

NLV-PF

Type:

Drum Core, Wirewound

Inductance:56 μ H**Current Rating (Amps):**

75 mA

Shielding:

Unshielded

Q @ Freq:

20 @ 2.52MHz

Ratings:

-

Inductance Frequency - Test:

2.52 MHz

Package / Case:

1008 (2520 Metric)

Size / Dimension:

0.098" L x 0.079" W (2.50mm x 2.00mm)

Manufacturer:

TDK Corporation

Product Status:

Not For New Designs

Material - Core:

Ferrite

Tolerance: \pm 5%**Current - Saturation (Isat):**

-

DC Resistance (DCR):

12.10hm Max

Frequency - Self Resonant:

16MHz

Operating Temperature:

-40°C ~ 105°C

Mounting Type:

Surface Mount

Supplier Device Package:

1008 (2520 Metric)

Height - Seated (Max):

0.075" (1.90mm)

Environmental & Export classification

RoHS Status:

ROHS3 Compliant

REACH Status:

REACH Affected

HTSUS:

8504.50.8000

Moisture Sensitivity Level (MSL):

1 (Unlimited)

ECCN:

EAR99

Inductors for Standard Circuits

Wound Ferrite

NLV-PF Series

NLV25-PF Type

NLV25-PF

Caution

**The products in this catalog is not recommended
to a new design**

Please refer to our Web site about replacement information.

INDUCTORS 

REMINDERS FOR USING THESE PRODUCTS

Before using these products, be sure to request the delivery specifications.

SAFETY REMINDERS

Please pay sufficient attention to the warnings for safe designing when using these products.

 **REMINDERS**

- The storage period is less than 6 months. Be sure to follow the storage conditions (Temperature: 5 to 40°C, Humidity: 10 to 75% RH or less).
If the storage period elapses, the soldering of the terminal electrodes may deteriorate.
- Do not use or store in locations where there are conditions such as gas corrosion (salt, acid, alkali, etc.).
- Before soldering, be sure to preheat components.
The preheating temperature should be set so that the temperature difference between the solder temperature and chip temperature does not exceed 150°C.
- Soldering corrections after mounting should be within the range of the conditions determined in the specifications.
If overheated, a short circuit, performance deterioration, or lifespan shortening may occur.
- When embedding a printed circuit board where a chip is mounted to a set, be sure that residual stress is not given to the chip due to the overall distortion of the printed circuit board and partial distortion such as at screw tightening portions.
- Self heating (temperature increase) occurs when the power is turned ON, so the tolerance should be sufficient for the set thermal design.
- Carefully lay out the coil for the circuit board design of the non-magnetic shield type.
A malfunction may occur due to magnetic interference.
- Use a wrist band to discharge static electricity in your body through the grounding wire.
- Do not expose the products to magnets or magnetic fields.
- Do not use for a purpose outside of the contents regulated in the delivery specifications.
- The products listed on this catalog are intended for use in general electronic equipment (AV equipment, telecommunications equipment, home appliances, amusement equipment, computer equipment, personal equipment, office equipment, measurement equipment, industrial robots) under a normal operation and use condition.
The products are not designed or warranted to meet the requirements of the applications listed below, whose performance and/or quality require a more stringent level of safety or reliability, or whose failure, malfunction or trouble could cause serious damage to society, person or property.
If you intend to use the products in the applications listed below or if you have special requirements exceeding the range or conditions set forth in the each catalog, please contact us.

| <ul style="list-style-type: none"> (1) Aerospace/Aviation equipment (2) Transportation equipment (cars, electric trains, ships, etc.) (3) Medical equipment (4) Power-generation control equipment (5) Atomic energy-related equipment (6) Seabed equipment (7) Transportation control equipment | <ul style="list-style-type: none"> (8) Public information-processing equipment (9) Military equipment (10) Electric heating apparatus, burning equipment (11) Disaster prevention/crime prevention equipment (12) Safety equipment (13) Other applications that are not considered general-purpose applications |
|---|---|

When designing your equipment even for general-purpose applications, you are kindly requested to take into consideration securing protection circuit/device or providing backup circuits in your equipment.

INDUCTORS 

Inductors for Standard Circuits
Wound Ferrite

Product compatible with RoHS directive
Halogen-free
Compatible with lead-free solders

Overview of NLV25-PF Type

FEATURES

- Resin mold type wound inductor for standard circuits.
- E-12 Series, wide lineup compatible with J (±5%) tolerance, can be used for applications that need to meet strict L tolerance such as filter circuits.
- Has excellent inductance temperature characteristics in the operating temperature range.

APPLICATION

- Smart meters, AV equipment, xDSL, electronic devices for communications infrastructure such as mobile base stations, industrial equipment, other

OPERATING TEMPERATURE RANGE, PACKAGE QUANTITY, PRODUCT WEIGHT

Type	Temperature range		Package quantity (pieces/reel)	Individual weight (mg)
	Operating temperature* (°C)	Storage temperature** (°C)		
NLV25-PF	-40 to +105	-40 to +105	2000	25

* Operating temperature range includes self-temperature rise.
** The Storage temperature range is for after the circuit board is mounted.

- RoHS Directive Compliant Product: See the following for more details.<https://product.tdk.com/info/en/environment/rohs/index.html>
- Halogen-free: Indicates that Cl content is less than 900ppm, Br content is less than 900ppm, and that the total Cl and Br content is less than 1500ppm.

* Rated current: smaller value of either I_{dc1} or I_{dc2}.

I_{dc1}: When based on the inductance change rate (10% below the initial L value)

I_{dc2}: When based on the temperature increase (Temperature increase of 20°C by self heating)
