

NLV32T-100J-PF Datasheet

www.digi-electronics.com

DiGi Electronics Part Number	NLV32T-100J-PF-DG
Manufacturer	TDK Corporation
Manufacturer Product Number	NLV32T-100J-PF
Description	FIXED IND 10UH 150MA 2.1 OHM SMD
Detailed Description	10 μH Unshielded Drum Core, Wirewound Inductor 150 mA 2.10hm Max 1210 (3225 Metric)

https://www.DiGi-Electronics.com

Tel: +00 852-30501935

RFQ Email: Info@DiGi-Electronics.com

DiGi is a global authorized distributor of electronic components.

Purchase and inquiry

Manufacturer Product Number:	Manufacturer:
NLV32T-100J-PF	TDK Corporation
Series:	Product Status:
NLV-PF	Not For New Designs
Туре:	Material - Core:
Drum Core, Wirewound	Ferrite
Inductance:	Tolerance:
10 µН	±5%
Current Rating (Amps):	Current - Saturation (Isat):
150 mA	
Shielding:	DC Resistance (DCR):
Unshielded	2.10hm Max
Q @ Freq:	Frequency - Self Resonant:
30 @ 2.52MHz	30MHz
Ratings:	Operating Temperature:
	-40°C ~ 105°C
Inductance Frequency - Test:	Mounting Type:
2.52 MHz	Surface Mount
Package / Case:	Supplier Device Package:
1210 (3225 Metric)	1210
Size / Dimension:	Height - Seated (Max):
0.126" L x 0.098" W (3.20mm x 2.50mm)	0.094" (2.40mm)

Environmental & Export classification

RoHS Status:	Moisture Sensitivity Level (MSL):
ROHS3 Compliant	1 (Unlimited)
REACH Status:	ECCN:
REACH Affected	EAR99
HTSUS:	
8504.50.8000	

September 2017

Inductors for Standard Circuits

Wound Ferrite

NLV-PF Series

NLV32-PF

3225 [1210 inch]*

* Dimensions Code JIS[EIA]

A Caution

The products in this catalog will be or have been stopped production

Please refer to our Web site about replacement information.

⊗TDK

REMINDERS FOR USING THESE PRODUCTS

Before using these products, be sure to request the delivery specifications.

SAFETY REMINDERS

Please pay sufficient attention to the warnings for safe designing when using these products.

∧ REMINDERS ○ The storage period is less than 6 months. Be sure to follow the storage conditions (Temperature: 5 to 40°C, Humidity: 10 to 75% RH or less). If the storage period elapses, the soldering of the terminal electrodes may deteriorate. O Do not use or store in locations where there are conditions such as gas corrosion (salt, acid, alkali, etc.). O Before soldering, be sure to preheat components. The preheating temperature should be set so that the temperature difference between the solder temperature and chip temperature does not exceed 150°C. Soldering corrections after mounting should be within the range of the conditions determined in the specifications. If overheated, a short circuit, performance deterioration, or lifespan shortening may occur. O When embedding a printed circuit board where a chip is mounted to a set, be sure that residual stress is not given to the chip due to the overall distortion of the printed circuit board and partial distortion such as at screw tightening portions. Self heating (temperature increase) occurs when the power is turned ON, so the tolerance should be sufficient for the set thermal design. Carefully lay out the coil for the circuit board design of the non-magnetic shield type. A malfunction may occur due to magnetic interference. ○ Use a wrist band to discharge static electricity in your body through the grounding wire. O Do not expose the products to magnets or magnetic fields. O Do not use for a purpose outside of the contents regulated in the delivery specifications. O The products listed on this catalog are intended for use in general electronic equipment (AV equipment, telecommunications equipment, home appliances, amusement equipment, computer equipment, personal equipment, office equipment, measurement equipment, industrial robots) under a normal operation and use condition. The products are not designed or warranted to meet the requirements of the applications listed below, whose performance and/or quality require a more stringent level of safety or reliability, or whose failure, malfunction or trouble could cause serious damage to society, person or property. If you intend to use the products in the applications listed below or if you have special requirements exceeding the range or conditions set forth in the each catalog, please contact us. (1) Aerospace/Aviation equipment (8) Public information-processing equipment (2) Transportation equipment (cars, electric trains, ships, etc.) (9) Military equipment (10) Electric heating apparatus, burning equipment (3) Medical equipment (4) Power-generation control equipment (11) Disaster prevention/crime prevention equipment (5) Atomic energy-related equipment (12) Safety equipment (6) Seabed equipment (13) Other applications that are not considered general-purpose (7) Transportation control equipment applications When designing your equipment even for general-purpose applications, you are kindly requested to take into consideration securing

protection circuit/device or providing backup circuits in your equipment.

INDUCTORS

Inductors for Standard Circuits Wound Ferrite

Product compatible with RoHS directive Halogen-free Compatible with lead-free solders

Overview of NLV32-PF Type

FEATURES

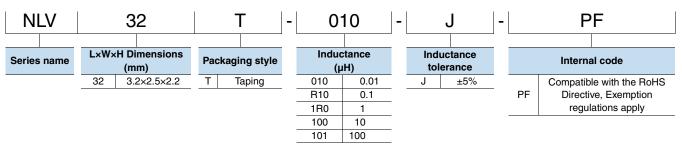

O Resin mold type wound inductor for standard circuits.

- E-12 Series, wide lineup compatible with J (±5%) tolerance, can be used for applications that need to meet strict L tolerance such as filter circuits.
- O Has excellent inductance temperature characteristics in the operating temperature range.

APPLICATION

Smart meters, AV equipment, xDSL, electronic devices for communications infrastructure such as mobile base stations, industrial equipment, other

PART NUMBER CONSTRUCTION

OPERATING TEMPERATURE RANGE, PACKAGE QUANTITY, PRODUCT WEIGHT

	Temperat	ure range	Package quantity	Individual weight
Туре	Operating temperature*	Storage temperature**		
	(° C)	(°C)	(pieces/reel)	(mg)
NLV32-PF	-40 to +105	-40 to +105	2000	50

* Operating temperature range includes self-temperature rise.

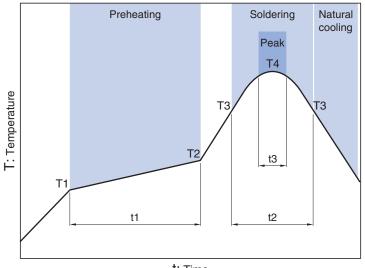

** The Storage temperature range is for after the circuit board is mounted.

O RoHS Directive Compliant Product: See the following for more details.https://product.tdk.com/info/en/environment/rohs/index.html

O Halogen-free: Indicates that CI content is less than 900ppm, Br content is less than 900ppm, and that the total CI and Br content is less than 1500ppm.
