PFC3318QM-601K03E-00 Datasheet

https://www.DiGi-Electronics.com

DiGi Electronics Part Number	PFC3318QM-601K03E-00-DG
Manufacturer	TDK Corporation
Manufacturer Product Number	PFC3318QM-601K03E-00
Description	CHOKE COIL 600UH 2.8A TH
Detailed Description	600 µH Unshielded Drum Core, Wirewound Inductor 2.8 A Radial, Horizontal, 8 Leads Choke Coils for PFC (Pin Terminal Type)

Tel: +00 852-30501935

RFQ Email: Info@DiGi-Electronics.com

Purchase and inquiry

Manufacturer Product Number:	Manufacturer:
PFC3318QM-601K03E-00	TDK Corporation
Series:	Product Status:
PFC	Active
Type:	Material - Core:
Drum Core, Wirewound	Ferrite
Inductance:	Tolerance:
600 µH	±10%
Current Rating (Amps):	Current - Saturation (Isat):
2.8 A	-
Shielding:	DC Resistance (DCR):
Unshielded	-
Q @ Freq:	Frequency - Self Resonant:
-	-
Ratings:	Operating Temperature:
-	-30°C ~ 120°C
Inductance Frequency - Test:	Features:
50 kHz	Choke Coils for PFC (Pin Terminal Type)
Mounting Type:	Package / Case:
Through Hole	Radial, Horizontal, 8 Leads
Supplier Device Package:	Size / Dimension:
-	1.378" L x 1.102" W (35.00mm x 28.00mm)
Height - Seated (Max):	
0.787" (20.00mm)	

Environmental & Export classification

RoHS Status:	Moisture Sensitivity Level (MSL):
ROHS3 Compliant	1 (Unlimited)
ECCN:	HTSUS:
EAR99	8504.50.8000

August 2021

An attention matter on use

Please read this specifications before using this product by all means.

An attention matter on security

I undertake use with this product, and it is paid attention enough, and please design an attention matter safely.

⚠ Attention on a design

- When designing the board, use our recommended hole diameter or pad.
- Magnetic flux to leak out occurs. Please confirm it about influence of magnetic flux beforehand.
  There is fear to cause false movement of machinery.
- When designing the board, ensure a distance from the transformer in accordance with the applicable safety standards.
- The product is not quakeproof structure. Accordingly please do not add vibration and a shock to it.
  The product produces possibility to lose a function.

⚠ Attention on the handling

- Please do not use it when you let a product drop.
  The product produces possibility to lose a function.
- Be careful not to get injured because the tip of the terminal is sharpened by soldering.
- For storage, avoid dust, dust, fog, water droplets and direct sunlight.
  There is fear to cause false movement of machinery.
- Do not use or store in an environment with gas corrosion (salt, acid, alkali, etc.).
  The product produces possibility to lose a function.
- When mounting, do not apply excessive force to the product with metal tools or the like.
  The product produces possibility to lose a function.

⚠ Attention

- The structure and number of turns (magnetic mounting) are determined in consideration of safety standards, power supply voltage, circuit drive conditions (drive frequency and maximum ON period), etc., so avoid using them outside the design conditions.
  There are destruction of a circuit part and fear of ignition.
- The operating temperature and humidity ranges are determined in consideration of the characteristics of the components and the self-temperature rise, so please avoid using in a range exceeding this range.
  There is a risk of burning or ignition.
- Avoid using it in an environment where dust and dirt are likely to adhere.
  There is a risk of cause a fire.
- The products listed on this specification sheet are intended for use in general electronic equipment (AV equipment, telecommunications equipment, home appliances, amusement equipment, computer equipment, personal equipment, office equipment, measurement equipment, industrial robots) under a normal operation and use condition.
- The products are not designed or warranted to meet the requirements of the applications listed below, whose performance and/or quality require a more stringent level of safety or reliability, or whose failure, malfunction or trouble could cause serious damage to society, person or property.
- Please note that we are not responsible for any damages caused by exceeding the scope and conditions of this specification or by using it for a specific purpose
- If you exceed the scope and conditions of this specification, or plan to use it for a specific purpose, please contact us in advance.
- We will discuss specifications other than those listed in this specification according to the customer's application.

(1) Aerospace/Aviation equipment
(2)Transportation equipment (cars, electric trains, ships, etc.)
(3) Medical equipment
(4) Power-generation control equipment
(5) Atomic energy-related equipment
(6) Seabed equipmentapplications
(7) Transportation control equipment
(8) Public information-processing equipment
(9) Military equipment
(10) Electric heating apparatus, burning equipment
(11) Disaster prevention/crime prevention equipment
(12) Safety equipment
(13) Other applications that are not considered general-purpose applications

When designing your equipment even for general-purpose applications, you are kindly requested to take into consideration securing protection circuit/device or providing backup circuits in your equipment.

Choke Coils for PFC

PFC series

Contents Page

Choke Coils for PFC

Pin terminal type

Development Concept of the PFC series

This is a power - factor improvement circuit for choke coils for smaller, thinner and narrow floor space in recent years electronic equipment.

MATERIAL

Thanks to the development of an optimized core shape and materials, the choke coil has DC superimposition characteristics suitable for the design of various types of electronic devices.
Optimized materials have been selected, and at the same time the original core shape for PFC has been developed.
The product line-up has been expanded to cater for various types of electronic devices that need to become smaller, thinner and narrow floor space.

MANUFACTURING METHOD

Since the PFC Series supports automatic winding, the product is of a high quality and can be manufactured stably.
It is designed to support automatic winding, which enables a remarkable reduction in the loss generated to achieve a proficient in manual winding until stable production.
In addition, the characteristic variations of the winding wire and creepage tape have largely been removed, stabilizing the transformer's characteristics.

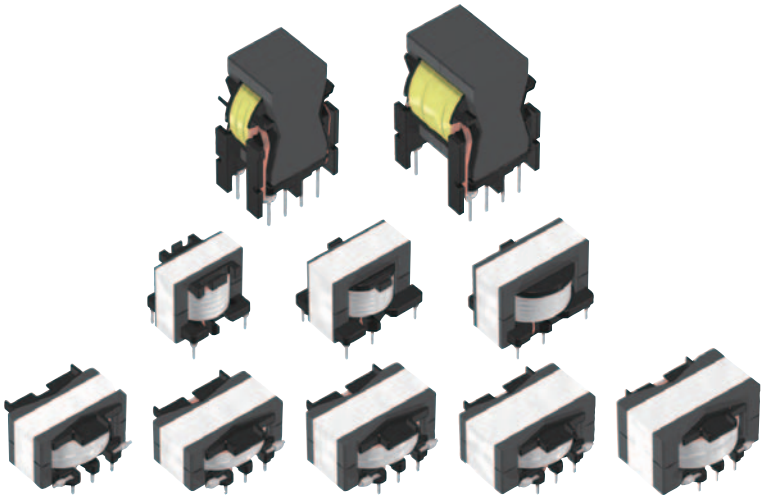
OPTIMIZATION DESIGN

While the existing line-up of standard products remains available, new products can also be manufactured to meet customers' requests.
Using design tools developed with TDK's comprehensive know-how, high-precision design has been achieved in a short period of time.

1) For optimization design and high-quality stable production, customers can use a specification request form.
   If you provide the necessary information in the form, you will receive the optimization design in a short time.
2) TDK recommends design with a standard core gap (A_L-value) for optimization and shorter trial and mass production lead time.

ENVIRONMENT

The PFC series is RoHS directive-compliant product.



Choke Coils for PFC

Pin terminal type

Product compatible with RoHS directive
Compatible with lead-free solders

Overview of the PFC series

FEATURES

- A low height(15.5 to 27mm in height) and narrow floor space(QN type) are achieved.
- Large current is achieved in a small shape.

APPLICATION

AV equipment, digital consumer electronics

PART NUMBER CONSTRUCTION

PFC 3514QM - 351 K 07 E-**

Series name	Core shape
