DiGi Electronics Part Number VLF252015MT-1R0N-DG

Manufacturer TDK Corporation

Manufacturer Product Number VLF252015MT-1R0N

Description FIXED IND 1UH 3.13A 30 MOHM SMD

Detailed Description 1 µH Shielded Drum Core, Wirewound Inductor 3.13

A 30mOhm Max 1008 (2520 Metric)

Tel: +00 852-30501935

RFQ Email: Info@DiGi-Electronics.com

DiGi is a global authorized distributor of electronic components.

REMINDERS FOR USING THESE PRODUCTS

Before using these products, be sure to request the delivery specifications.

SAFETY REMINDERS

Please pay sufficient attention to the warnings for safe designing when using these products.

| The storage period is less than 12 months. Be sure to follow the storage conditions (Temperature: 5 to 40°C, Humidity: 10 or less). If the storage period elapses, the soldering of the terminal electrodes may deteriorate. | to 75% R |
|---|------------|
| Do not use or store in locations where there are conditions such as gas corrosion (salt, acid, alkali, etc.). | |
| Before soldering, be sure to preheat components. The preheating temperature should be set so that the temperature difference between the solder temperature and chip ter does not exceed 150°C. | nperature |
| Soldering corrections after mounting should be within the range of the conditions determined in the specifications. If overheated, a short circuit, performance deterioration, or lifespan shortening may occur. | |
| When embedding a printed circuit board where a chip is mounted to a set, be sure that residual stress is not given to the other overall distortion of the printed circuit board and partial distortion such as at screw tightening portions. | hip due to |
| Self heating (temperature increase) occurs when the power is turned ON, so the tolerance should be sufficient for the set to design. | hermal |
| Carefully lay out the coil for the circuit board design of the non-magnetic shield type. A malfunction may occur due to magnetic interference. | |
| Use a wrist band to discharge static electricity in your body through the grounding wire. | |
| ○ Do not expose the products to magnets or magnetic fields. | |
| Do not use for a purpose outside of the contents regulated in the delivery specifications. | |
| The products listed on this catalog are intended for use in general electronic equipment (AV equipment, telecommunication equipment, home appliances, amusement equipment, computer equipment, personal equipment, office equipment, measure equipment, industrial robots) under a normal operation and use condition. The products are not designed or warranted to meet the requirements of the applications listed below, whose performance | irement |

quality require a more stringent level of safety or reliability, or whose failure, malfunction or trouble could cause serious damage to

If you intend to use the products in the applications listed below or if you have special requirements exceeding the range or conditions

When designing your equipment even for general-purpose applications, you are kindly requested to take into consideration securing protection circuit/device or providing backup circuits in your equipment.

Inductors for Power Circuits

Wound Ferrite

Product compatible with RoHS directive
Halogen-free
Compatible with lead-free solders

Overview of VLF252015MT Type

FEATURES

- Magnetic shield type wound inductor for power circuits.
- A DC-DC converter with top-class voltage conversion efficiency for similar products was achieved by optimizing the magnetic material and configuration.
- O Low-profile product.
- O High magnetic shield construction and compatible with high-density mounting.
- O Halogen-free compatible product.

APPLICATION

Smart phones, tablet terminals, HDDs, SSDs, DVCs, DSCs, mobile display panels, portable game devices, compact power supply modules, other

^{**} The Storage temperature range is for after the circuit board is mounted.

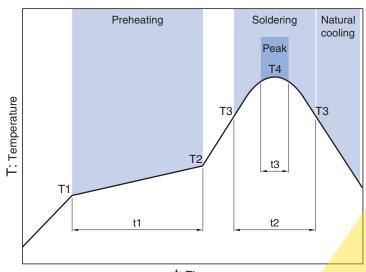

RoHS Directive Compliant Product: See the following for more details.https://product.tdk.com/info/en/environment/rohs/index.html

[🔾] Halogen-free: Indicates that CI content is less than 900ppm, Br content is less than 900ppm, and that the total CI and Br content is less than 1500ppm.
